PERSONAL STATEMENT:

Graduate in BSc Computer Science (AI) bringing a solid foundation in various programming languages and AI solutions. Passionate about leveraging innovative technologies to drive innovation, solve real-world problems, and actively contribute to the company's strategic vision and growth.

EDUCATION:

BSc (Hons) Computer Science (Artificial Intelligence)
University of Hertfordshire (2022 – Present)

Courses included: Advanced AI, Robotics, and Software Architecture, Data Modelling for Databases, Computational Problem Solving, Operating Systems and Networking, Advanced Artificial Intelligence, Machine Learning, Social and Collective AI.

Montfort School Anakkara (2019 – 2021)
Majors in Math and Computer Science (A Levels equivalent)

SKILLS:

- **AI & Machine Learning:** PyTorch, CUDA, TensorFlow, Hugging Face, OpenCV, NumPy
- **Front-End:** React, JavaScript, Figma
- **Back-End:** Python, Node.js, Docker, C++
- **Databases:** Oracle SQL, MongoDB
- **Cloud & DevOps:** AWS, Docker
- **Version Control:** Git, GitHub

SOFT SKILLS

Communication, problem solving, analytics, time management, collaboration, troubleshooting.

PROJECTS:

AI Pocket Tutor

Developed an AI powered learning assistant designed to help users to break down complex topics with an Interactive conversation and personalized test. Implemented LLM's and enhanced the capabilities by building RAG systems and Agentic systems

Technologies: Python, Hugging Face, PyTorch, Whisper, React, AWS

Air Canvas

A real-time drawing application that uses hand movements and gestures for interactive control

Technologies: Python, OpenCV, Mediapipe

Air Mouse

A gesture-controlled program to control the cursor using hand gestures

Technologies: Python, OpenCV, Mediapipe, PyAutoGUI

Dion

A web app for a CRM platform to provide a seamless user experience and customizable design.

Technologies: React, JavaScript, Vite

Venzini Fanatic

A UI/UX design for a website to host car meetings, shop cars, shop parts for cars and to find and book car events

Technologies: Figma

WORK EXPERIENCE:

UH Racing

University of Hertfordshire (Dec 2023 – Mar 2024)

- Implemented a YOLOv8-based cone-detection system for the vision sector of Formula Student Racing.
- Fine-tuned YOLO model with 3000 samples and achieved above 96% accuracy on the Jetson Orin GPU.
- Tweaked hyper-parameters and TensorRT FP16 quantisation to improve efficiency and reduce latency from 28 ms to 17 ms.
- Collaborated with team members in planning setting timelines and version control.

Crew Member

Burger King (Jan 2023 – Present)

- Delivered excellent customer service by professionally handling orders and addressing customer inquiries.
- Collaborated with team members to ensure smooth operations during high-demand periods, fostering a supportive and efficient work environment.
- Took responsibility for various kitchen operations, including food preparation, Inventory Management, and upholding hygiene standards.

Warehouse Operator

Yodel (Nov 2022 – Dec 2022)

- Collaborated effectively with colleagues to keep a seamless workflow and achieve daily operational goals in a dynamic setting.
- Ensured exact and prompt parcel sorting and distribution, contributing to smooth workflow.

HOBBIES

Gaming, Hiking, Chess
